Sustainability objectives 2012	Overview of progress	Status of completion
1. Resource efficiency All sites to reduce use of energy by 2.5 percent	- Energy use reduced by about three percent in 2012	
annually		
Water: Action plans at facilities in water	- ABB Water Tool rolled out to facilities in water scarce and	
stressed regions	extremely water scarce areas - Water Action plans developed for 34 facilities	
2. Travel		
Develop action plans to reduce the environmen- tal impact of business air travel	 Low levels of progress on action plans. However, overall CO₂ emissions from business air travel by ABB staff dropped by seven 	
	percent in 2012 compared to 2011	
3. Risk assessment		
Formal review of social, security, OHS and envi- ronmental risks instituted at early stage of divi-	 Formal assessments of risks carried out at divisional and Business Unit levels. Regular reviews in some areas of business; 	
sional project risk assessments	still sporadic in other areas	
4. Crisis management		
Maintain and improve crisis management, secu- rity and human rights capability		
Security and crisis management training/	- 38 crisis response training exercises at country level in 2012	
exercises in all regions during 2012 as part of regular three year program	 Nearly 100 percent coverage of all ABB countries over past three years 	
	 Other training included travel security briefings and general security awareness 	
Human rights training for senior employees in	- Two more training sessions in 2012, bringing to nine total held	
12 main manufacturing/export countries/regions by end of 2012	in different parts of world - First round of capacity building exercises held with more than	
	40 participants from different regions	
Implement security and crisis management	- Two security programs (crisis management and travel security)	
systems and programs across all regions, according to priorities based on risks and needs	completed across all regions	

5. Occupational health and safety (OHS) Consolidate implementation of programs identified in existing Executive Committee-approved OHS plan: Maintain strategic, Group-led OHS programs, such as OHS leadership training - OHS leadership training program maintained across regions for all line managers and their direct reports Maintain and increase the reach of Business - OHS leadership training on occupational hygiene delivered across all regions Maintain and increase the reach of Business - Maintained major OHS programs within Power Systems, Power Products and Process Automation divisions with increasing support of countries Support of Countries - Started new programs within Discrete Motion Motors and Generators, and Power Systems Croup Occupational Health physician Ensure implementation of country strategic - All countries submitted approved plans OHS plans, with quarterly KPI reporting - All countries submitted approved plans OHS plans, with quarterly KPI reporting - All countries submitted approved plans OHS plans, with quarterly KPI reporting - All countries submitted approved plans OHS incident data reporting extended and improved - OHS incident data reporting maintained, analyzed and results circulated to support management reviews locally OHS plans, with quarterly KPI reporting - All countries submitted approved plans OHS incident data reporting the supply chain through the Supplier Sustainability - OHS incident da	npletion
fied in existing Executive Committee-approved OHS plan: OHS leadership training program maintained across regions for all line managers and their direct reports Training on occupational hygiene delivered across all regions Fourth intake of candidates for International Diploma in Occupational Health and Safety Maintain and increase the reach of Business Unit-specific OHS initiatives Maintained major OHS programs within Power Systems, Power Products and Process Automation divisions with increasing support of countries Started new programs within Discrete Motion Motors and Generators, and Power Systems Grid Systems business units Appointed Group Service OHS advisor and Group Occupational Health physician Ensure implementation of country strategic OHS plans, with quarterly KPI reporting All countries submitted approved plans Quarterly reporting maintained, analyzed and results circulated to support management reviews locally OHS incident data reporting extended and improved 6. Supply chain Improve sustainability performance in the supply chain through the Supplier Sustainability	
OHS plan: - OHS leadership training Maintain strategic, Group-led OHS programs, such as OHS leadership training - OHS leadership training program maintained across regions for all line managers and their direct reports Training on occupational hygiene delivered across all regions - Fourth intake of candidates for International Diploma in Occupational Health and Safety Maintain and increase the reach of Business - Maintained major OHS programs within Power Systems, Power Products and Process Automation divisions with increasing support of countries Unit-specific OHS initiatives - Maintained major OHS programs within Discrete Motion Motors and Generators, and Power Systems Grid Systems business units Ensure implementation of country strategic - All countries submitted approved plans OHS plans, with quarterly KPI reporting - All countries submitted approved plans OHS plans, with quarterly KPI reporting - All countries submitted approved plans OHS incident data reporting extended and improved OHS incident data reporting extended and improved
