# ABB in summary

---

ABB is a pioneering technology leader in electrification products, robotics and motion, industrial automation and power grids, serving customers in utilities, industry and transport & infrastructure globally. Continuing more than a 125-year history of innovation, ABB today is writing the future of industrial digitalization and driving the Energy and Fourth Industrial Revolutions.

---

Sustainability considerations cover how we design and manufacture products, what we offer customers, how we engage suppliers, how we assess risks and opportunities, and how we behave in the communities where we operate and towards one another, while striving to ensure the health, safety and security of our employees, contractors and others affected by our activities.

---

We build long-lasting, value-creating partnerships with customers, suppliers, business partners, employees and the communities in which we operate.

---

Our sustainability performance reporting is guided by the Global Reporting Initiative's (GRI) G4 Guidelines. A summary table of numerical performance indicators is included. The independent assurance provider DNV GL has provided assurance of selected indicators and reviewed key data and claims in the report. Its assurance statement appears on page 64 of this report.
